Compared to other risks, what are the chances of needing Long-Term Care?

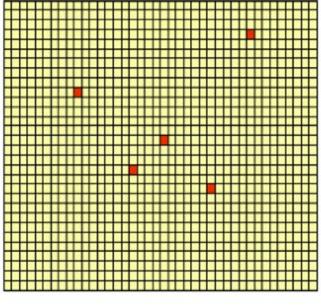

Odds of your home having a fire:

1 in 1,200

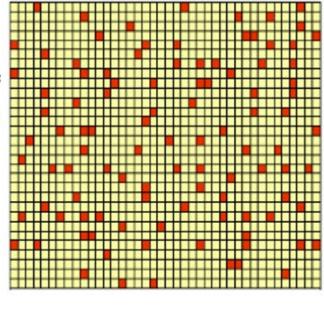

Odds of your auto being totaled:

5 in 1,200

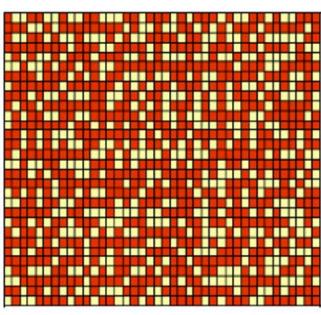

Odds of being hospitalized:

105 in 1,200

Odds of needing long term care:

840 in 1,200

Benefits of Long-Term Care Planning

 I want to stay at home as long as possible. (Most of the care is now being received at home.)

2. I am concerned about the consequences for my family. I want to be able to afford the cost of care without having to rely on my spouse and children to give me a bath and provide other caregiving duties.

3. A policy will help preserve my assets and provide a tax-free funding strategy to pay for care. It will provide peace of mind so I can have the retirement lifestyle I desire . . . and deserve!
